

Kingsmead Healthcare

EQUAL OPPORTUNITY POLICY FOR PATIENTS

It is the aim of Kingsmead Healthcare to ensure that no patient receives less favourable treatment on the grounds of gender, race, colour, sexual orientation, nationality or ethnic or national origins or is placed at a disadvantage by conditions or requirements which cannot be shown to be morally, legally or humanly justifiable.

It is the aim of the practice that patients are not discriminated against, either at the time of registration or any time thereafter, on the grounds of any disability or medical condition.

The Practice promises to treat every patient as an individual, without discrimination, with the focus on personal needs and respect for dignity, the delivery of the highest possible standards of care, all underlined by strictest confidentiality.

Advice, support and relevant information will be available in order to help patients make the right choices.

To this end there is an Equal Opportunity Policy and the Practice will aim at all times to carry out its organisational duties to patients in accordance with this policy.
